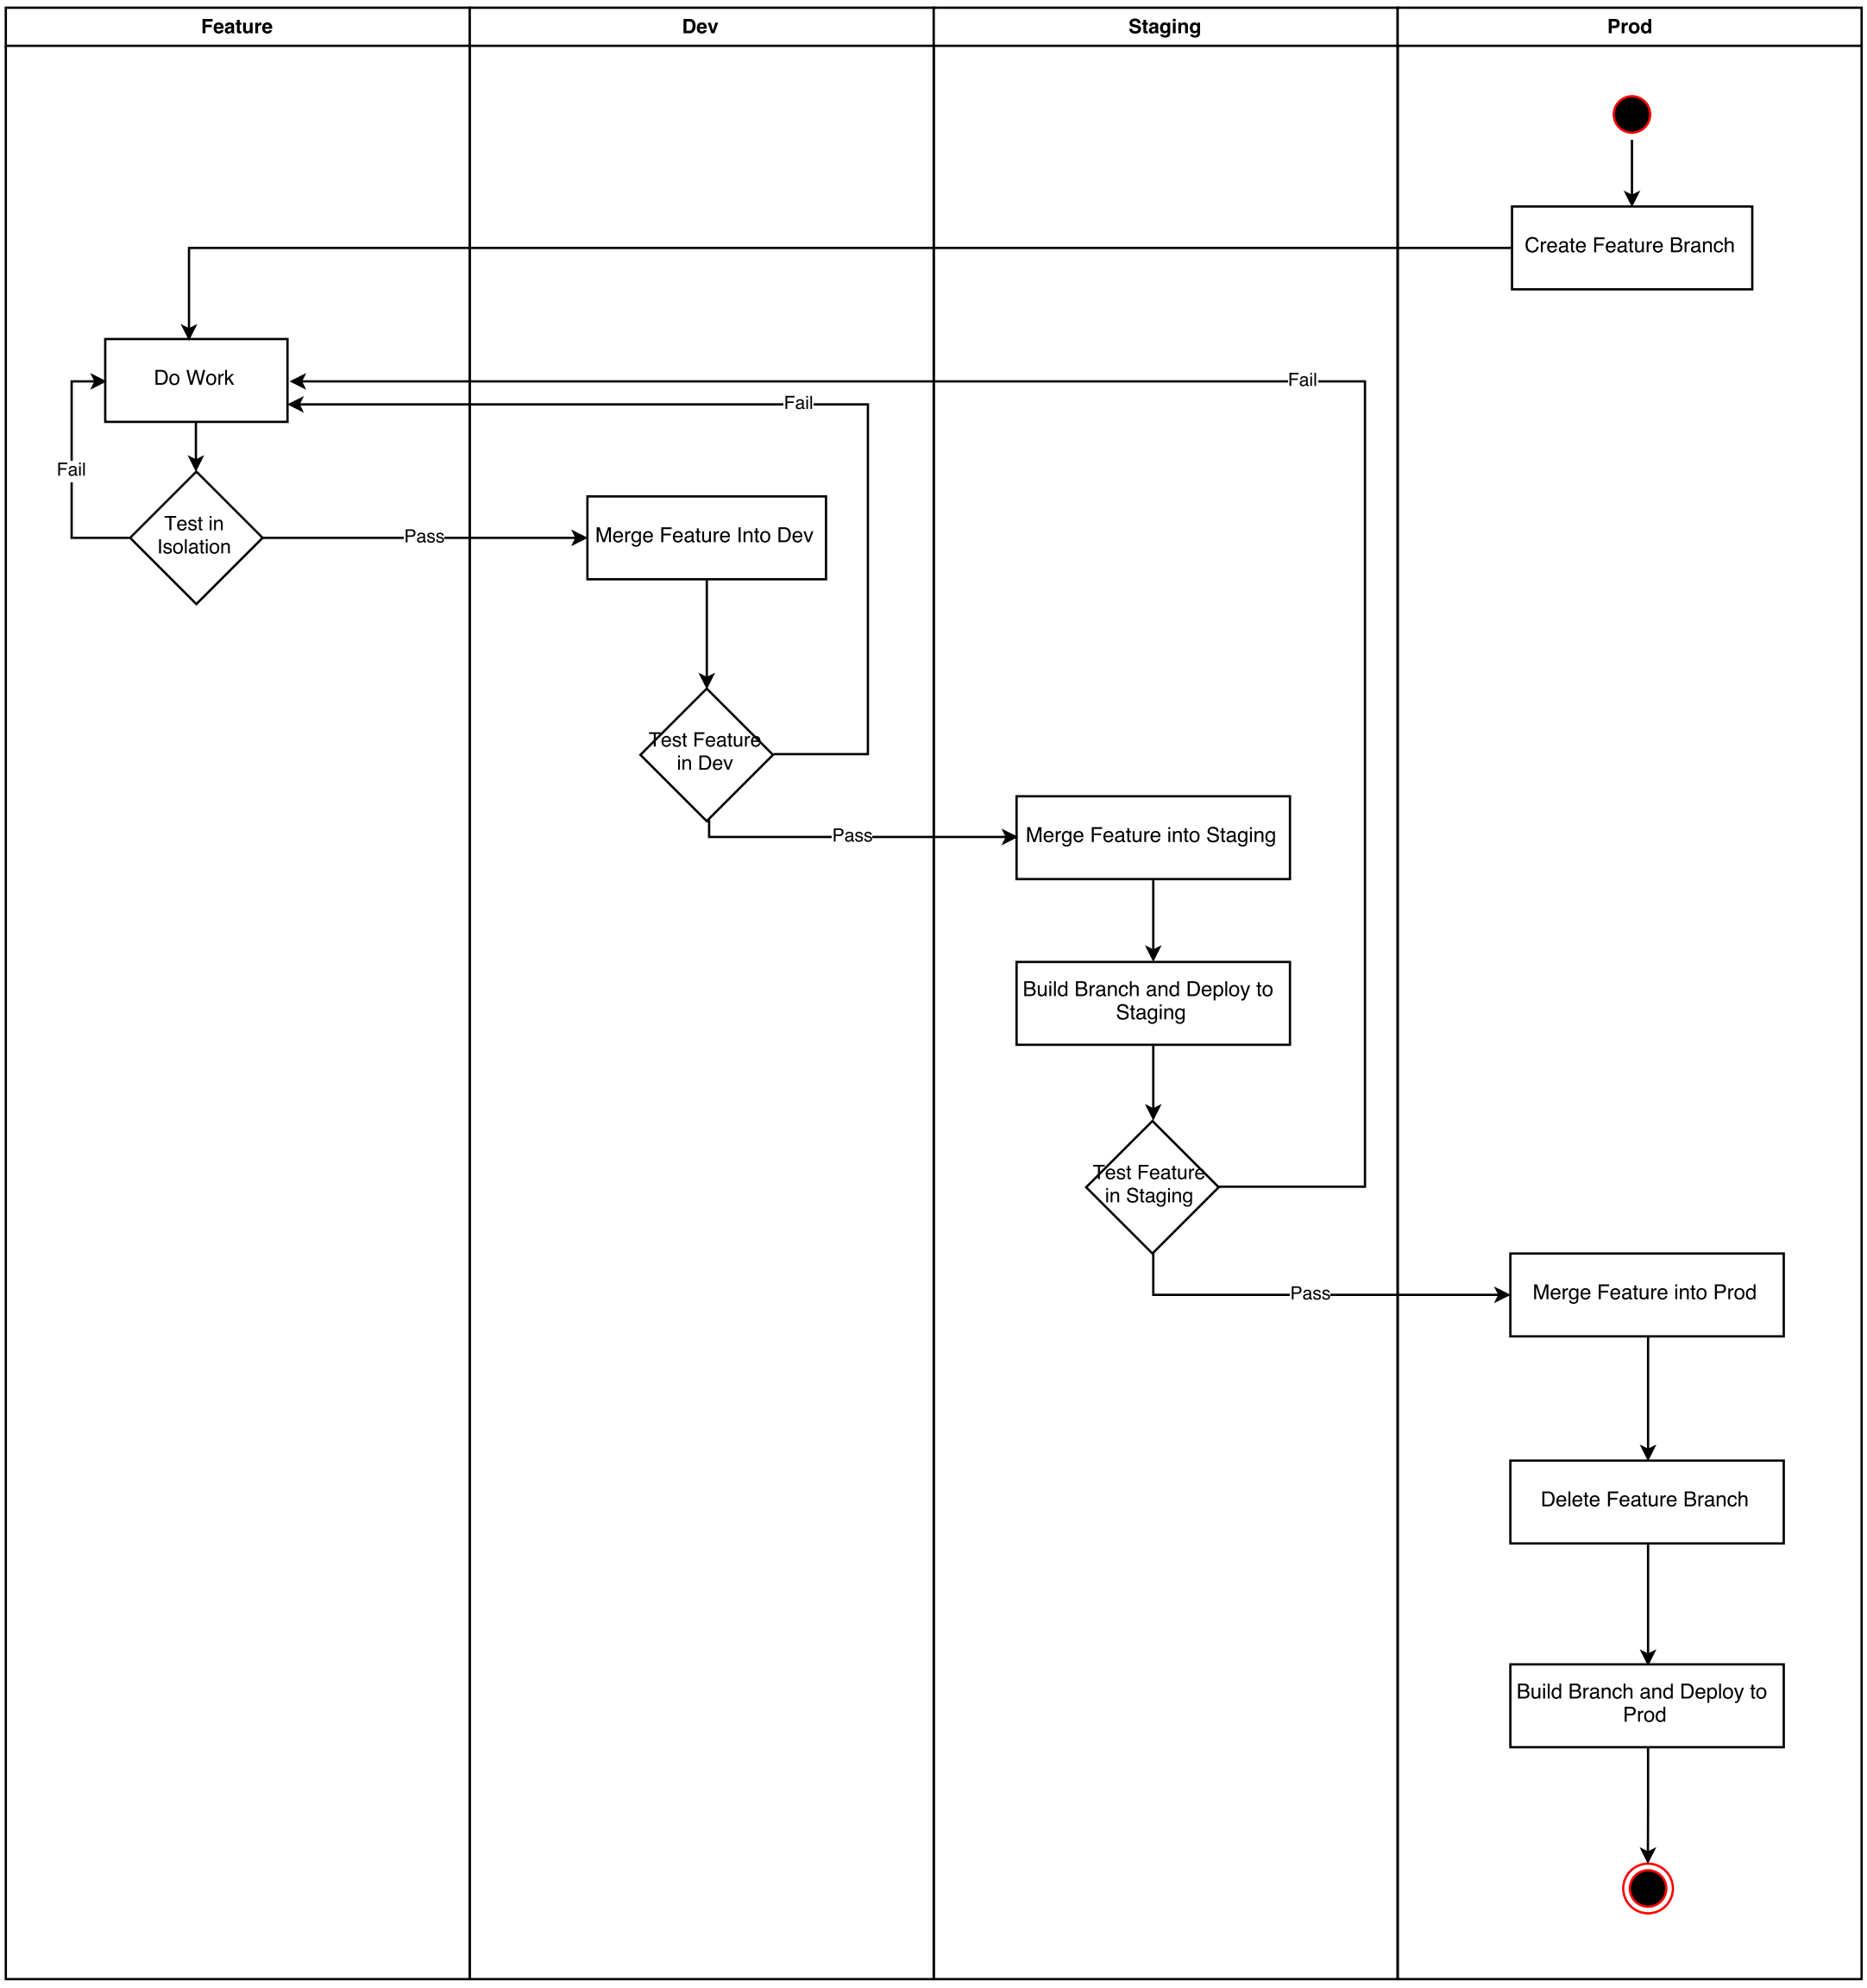
Activity Diagram for KanBan Branch Model



Assumptions

1. Transitions between branches assumes checkout of destination branch and any other required git process.
2. Failure in Prod branch assumes rollback strategy and creation of new feature branch.
3. Testing is assumed to be multifaceted.
4. Any other environment can be added between "Staging" and "Prod" for further testing.
5. A feature merged into "Prod" has been approved by all relevant stakeholders
6. The Actor performing the feature merges is not necessarily responsible for deploying the build.
